

Vringo Receives Notice of Allowance for First International Patent

February 22, 2012

NEW YORK, Feb. 22, 2012 /PRNewswire/ -- Vringo, Inc. (NYSE Amex: VRNG), a provider of software platforms for mobile social and video applications, today announced that it has received a notice of allowance from the European Patent Office (EPO) for the company's first international patent covering aspects of its mobile video and mobile personalization technologies.

Vringo's notice of allowance from the EPO relates to the expansion of patent no. 8,041,401 issued by the United States Patent and Trademark Office, entitled "Personalization Content Sharing System and Method." This international patent, when granted by the EPO, will have potential jurisdiction in approximately 39 countries in the EU.

"We are extremely pleased to have received our first International notice of allowance, which we anticipate will result in our first issued patent outside of the United States," said Andrew Perlman President of Vringo. "Our technology seeks to significantly enhance the core functionality that is at the heart of all cell phones – the phone call itself. Vringo believes this patent will provide additional protection for our video ringtone intellectual property and our other applications for personalizing the mobile experience for our loyal customers world-wide. We believe this patent will provide us with a competitive advantage as we continue to expand our core mobile video technology in Europe and emerging markets around the globe."

Vringo developed its core intellectual property and started filing its initial patent applications approximately six years ago, before much of the world was aware of the vast market potential for mobile applications. Since its inception, Vringo has filed over 20 patent applications in the U.S. and around the world.

Vringo's three previously issued patents are U.S. Patent No. 8,041,401, issued on October 18, 2011, U.S. Patent No. 7,761,816, issued on July 20, 2010, and U.S. Patent No. 7,877,746, issued on January 25, 2011. These patents cover the core features of Vringo's video ringtone sharing capabilities, and the personalization of standard compiled and signed software application downloads.

Vringo expects the EPO will issue the patent in the next 6 months. The patent will expire no earlier than January of 2027.

About Vringo

Vringo (NYSE Amex: VRNG) is a provider of software platforms for mobile social and video applications. With its award-winning video ringtone application and other mobile software platforms - including Facetones™, Video Remix and Fan Loyalty Vringo transforms the basic act of making and receiving mobile phone calls into a highly visual, social experience. Vringo's video ringtone service enables users to create or take video, images and slideshows from virtually anywhere and turn it into their visual call signature. In a first for the mobile industry, Vringo has introduced its patented VringForward technology, which allows users to share video clips with friends with a simple call. Vringo's Facetones™ application creates an automated video slideshow using friends' photos from social media web sites, which is played each time a user communicates with a friend using a mobile device. Vringo's Video ReMix application, in partnership with music artists and brands, allows users to create their own music video by tapping on a Smartphone or tablet. Lastly, Fan Loyalty is a platform that lets users interact, vote and communicate with contestants in reality TV series that it partners with, as well as downloading and setting clips from such shows as video ringtones. Vringo's video ringtone application has been heralded by The New York Times as "the next big thing in ringtones" and USA Today said it has "to be seen to be believed."
